

CYBERSECURITY

Business Platform

Lutech S.p.A. as a partner in Cybersecurity.

Revenue: 2mln.€ | Professionals: 25 | Case Studies: 140 | International Operations

Huge R&D and facilities investments in technology assets, Threat Management Services and Managed Cyber Defense services delivered by our Cybersecurity Command & Control Center - C4.

Innovation, cyber threats & compliances scouting, Forward-looking vision to drive actions, Risk-based approach for cost-effective investments.

15 years old of expertise in Consulting, Innovation, Security Strategy & Operations and Managed Cyber Defense.

WHAT WORKS

ENFORCEMENT

Design, implementation and deployment of rules and security "walls":

- Access Control with Default Deny
- Encrypt
- Harden & Patch

RESPONSE

Security incident response process, from containment of effects to determination of root-cause and collateral damages, aiming at recovery of normal operations:

- Be ready to contain something that will happen
- Business Continuity

DETECTION

Detection of anomalies, intrusions, security policy violations in order to triage an incident and activate next phase:

- Log, Inspect, Add context
- See, Analyze, Understand
- Stay vigilant
- React

ANTICIPATION

Knowledge of own defense with assessment, intrusion simulations, data classification, risk and business impact analysis, plus knowledge of the adversary with security intelligence & early warning:

- Borderless Visibility beyond the know Attack Surface (avoid "Maginot line" effect)
- Early Warning for better Response & Prevention
- Know your defense & Exercise
